Compliance-driven use cases

Examples of typical compliance-driven use cases

Sales & marketing

HR/HCM

Legal

Customer success & support

Finance

Audit & compliance

Regulated end-markets

Key regulated end-markets served

Financial services

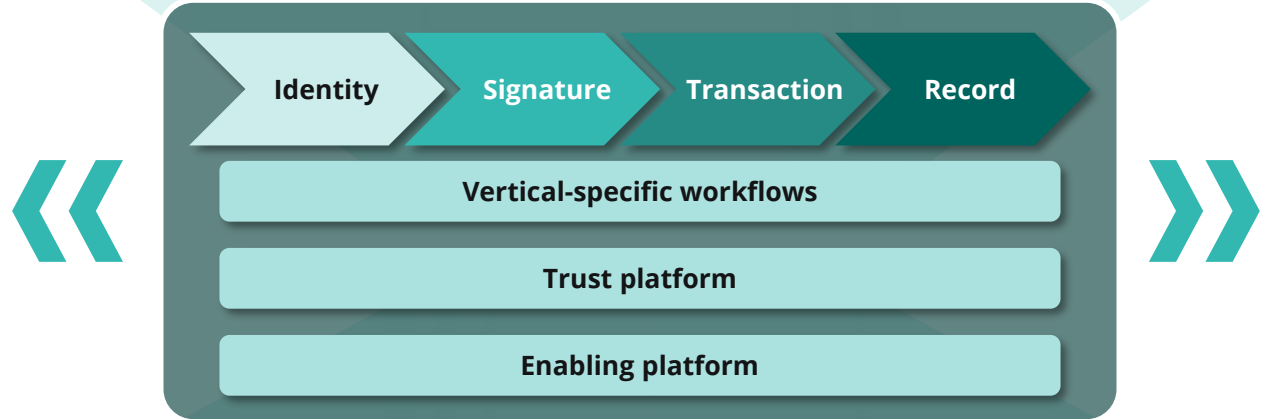

Telco & Media

Utilities

Public sector

Real Estate & Construction

Accountancy & Tax

2bn+
Cloud Signatures a year

~ 9bn
Long-term documents archived historically

40m+
Digital onboarding processes per year

35m+
Certificates issued Per year

From Digital Identity to Digital Trust

Asia has invested in:

Digital Identity

Singpass · MyDigital ID ·
NIK/IKD framework

Digital Payments

PayNow/PayNet · QRIS ·
DuitNow

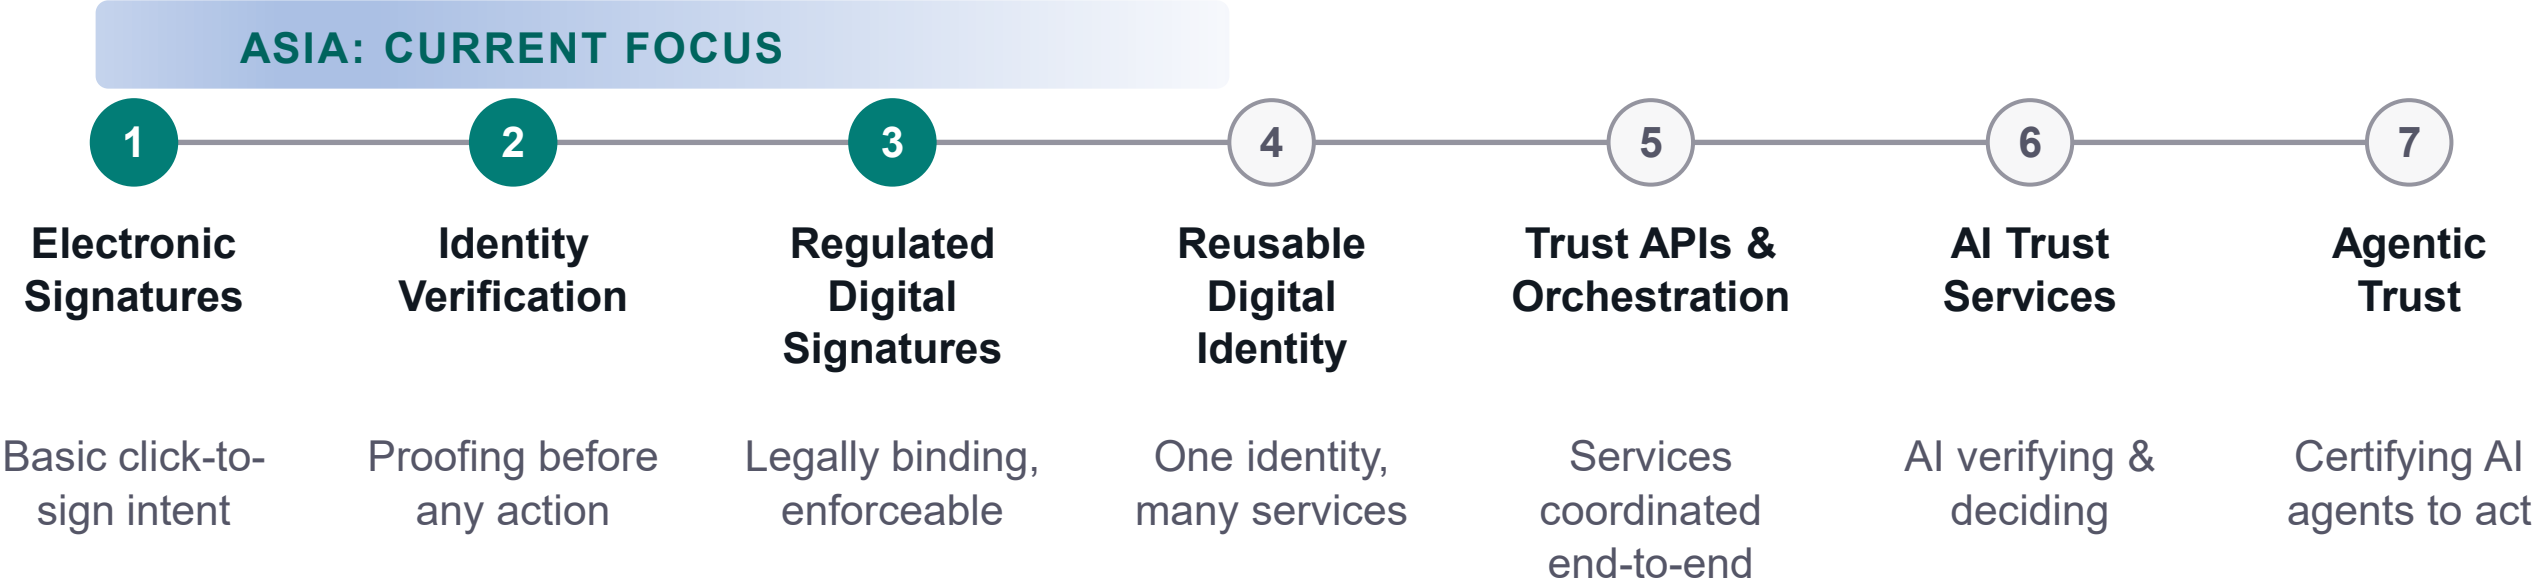

Digital Government

Unified citizen portals · e-tax &
permit filing

The next challenge is enabling trusted digital transactions.

A trusted transaction is one where **every party** is verified, **every action** is legally binding, and **every record** is tamper-proof, enabled by identity verification, regulated digital signatures, and PKI-based certificates working together.

The Evolution of Digital Trust

Digital signatures: the cornerstone of every trusted transaction, the step that makes it legally binding.

Trust Now Extends Beyond People to the Systems Acting for Them

Trust the document → **Trust who, or what, is acting**

Trusting:

- People
- Organizations
- Devices
- **AI Agents**

MCP-based Know Your Agent (KYA) — Bank Onboarding

AI agent verifies ID, runs AML checks, and applies the digital signature.

Insurance Policy Subscription

AI agent verifies the compliance framework, validates supporting documents, gets documents digitally signed, collects payments.

AI will only scale where trust can scale.

What We Are Building Across Asia

Helping governments, financial institutions and Trust Service Providers expand from Digital Identity to Digital Trust.

Launched in Asia in 2024, and seeing strong momentum since.

Current focus:

Identity Verification

Regulated Digital Signatures

PKI & Trust Services

Reusable Identity

AI Trust Services

MARKETS WITH TRACTION

Regulatory tailwinds + international clients' demand

- ▶ Malaysia
- ▶ Indonesia
- ▶ UAE
- ▶ Saudi Arabia
- ▶ Vietnam
- ▶ Philippines

THE OPPORTUNITY

The Opportunity

DIGITAL IDENTITY

Answers who you are.

DIGITAL TRUST

Answers what you can safely do, and proves it.

Identity is the credential. **Trust** is the transaction, the signature, the verification, the audit trail that make it enforceable.

The next decade belongs to Digital Trust.
